

A Standard in Sizes

Projects come in all sizes so we provide a variety of PCB patterns, enclosures and kits that revolve mainly around our three standard sizes:

- Size 1 = 80 x 50mm (3.15 x 1.97")
- Size 2 = 100 x 80mm (3.94 x 3.15")
- Size 3 = 160 x 100mm (6.30 x 3.94" - VME/Eurocard 3U)

Having these standard sizes for our enclosures and PCBs makes it easy to find ones that work together. This allows you to change to a different pattern PCB and know that it will still fit your enclosure.

For projects that won't fit on any of the three sizes we also have many other sizes of PCBs.

Use these icons to quickly identify the size of a PCB or Enclosure.
